# BALE OPENER

## Function

Opens bales of various types of materials, including some whole products, scrap materials, and short- to moderate-length fibers.

## Application

Allows further processing of baled material, including delivery to reclaim systems, vertical hoppers, or volumetric feeders.

## Operation

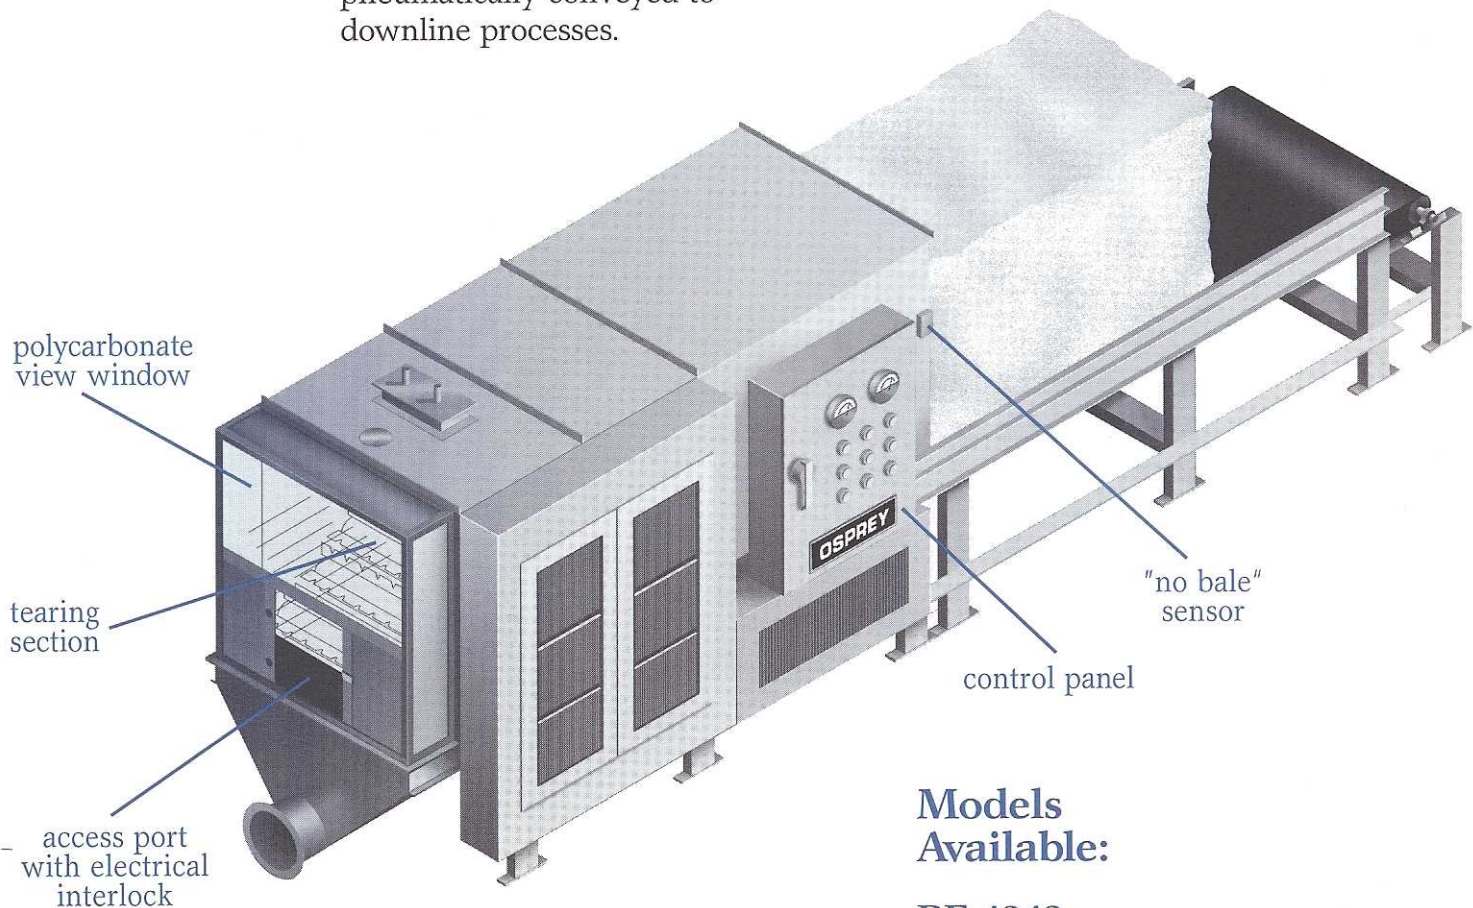

Bales enter the beater chamber of the bale opener where the tearing section accomplishes the breaking up of the bale. Material is pneumatically conveyed to downline processes.

## Features

- Oversized drive
- Heavy-duty construction
- Machined head and tail rolls
- Conveyor belt side seals
- Quick-removal tearing roll design

## Options

- 2-speed reversible drive
- Extended conveyor sections
- Multiple tearing roll configurations
