VENTURI EDGE TRIM PICK UP SYSTEM

Purpose

Collect and transport continuous edge trim.

Application

Plastic film (cast or blown), nonwovens, foil, paper, cloth, paperboard.

Features

- Reduces material size for re-use in process.
- Used in conjunction with granulator, cyclone, and surge stopper for closed-loop system.
- Minimum maintenance and operator time.
- Custom designed and sized.
- Flexible, modular construction.

Operation

- Edge trim picked up through multi-port manifolds.
- Conveyed through venturi to collection point.
- Can be re-introduced to production process.

Options

- Custom designed pick-up manifolds and receivers for edge and/or bleed trims.
- Field service.
- Spare parts.
